

## **DROP BY & SEE OUR LATEST ACQUISITION!**

**Mercury Blueprinting Inc. has just acquired a brand NEW Océ PlotWave® 900 – the first one in Ontario!**

**The NEW Océ PlotWave® 900 is the best wide format printing & scanning system designed to reproduce technical drawings with high speed & efficiency.**

### **Superior print quality**

- Outstanding monochrome print quality surpasses any high volume wide format system in the market today. This ensures that your design ideas are accurately represented.
- Excellent output quality when enlarging or shrinking an original.
- With its 1200 x 600 dpi print head and patented Océ CopyPress technology, the Océ PlotWave® 900 sets a new standard in digital wide format printing and with its outstanding grayscale capacity, your prints look great every time!
- Consistent high speed scanning capability provides first-time accurate results to make your old originals new again!

### **Faster with greater reliability means consistent turnaround**

- Critical components such as the imaging drum and other moving parts are enclosed to reduce contamination thereby ensuring that the system is ready when you are.
- With the Océ PlotWave® 900, high volumes, volume peaks, and short runs can be completed in less time than ever before!

### **Better for the environment**

- Océ CopyPress technology does not release any ozone at significant levels into the atmosphere and the toner efficiency is 100% (no waste toner).
- The NEW Océ PlotWave® 900 is EPA Energy Star Compliant to help reduce energy consumption.
- Machine runs on FSC & recycled media to protect our planet.
